About Us

Billur Tuz, as the first and only refined sea salt factory of Turkey, has been operating in Izmir since 1964. Billur Tuz, provides its all raw material from Çamaltı Saltwork. Çamaltı Saltwork is located near the Izmir Bird's Paradise, a natural reserve area, along the Aegean Sea Coast. Billur Tuz, which is now operating the biggest factory, most reliable and leader in salt sector in Turkey, increased its initial annual capacity of 12.000 tons to 250.000 tons in its modern facilities. Billur Tuz was established for the production of refined table salt, and in the course of time, invested in production facilities in line with market needs and added refined and washing industry salts, health salts and natural grinding salts to its portfolio.

What is Salt used for?

Salt Uses

Salt is crucial for many industries. Its compounds make it one of the most important materials in the chemical industry, since more than 50% of the chemical products depend on it at a stage of their manufacture. It is also used in the manufacturing of thousands of other commodities including glass, paper, rubber, and textiles as well as in water softening systems for industry and domestic use. Furthermore, it is used as a de-icing agent and as most commonly known food ingredient. For more detailed information of the different uses of salt, please see the chart.
